

Sprint Retrospective

1. Introduction

This document summarizes the sprint retrospective for E-Spaza Web Application. The purpose of this retrospective is to reflect on the sprint, identify what went well, what could be improved, and to outline action items for the next sprint.

2. What Went Well

- Successfully build most of our API and endpoints.
- Fully integrated API into frontend.
- Achieved an MVP for this sprint.
- Demonstration went well showcasing customer, staff and shop owner use cases.
- Improved on our presentation skills.
- Showed more of our workflow and testing
- Got our website fully hosted.

3. What Could Be Improved

- Should have had pipeline testing
- Have front end validation.

4. Plans for Future Sprint

Fix small bugs and add extra functionality that the client requested. The two big features are Maps and Barcode API integration.

5. Feedback from Team Members

Everyone is happy with progress

6. Action Items for Next Sprint

- Front-end input
 - validation
- External API
 - MAPS
 - Barcode
- Extra features
 - Multiple shops per owner

- Export to pdf button
 - Shop hours
- Fixes
 - Delete User
 - Order update

7. Conclusion

Conclude the document with a brief summary of the key takeaways from the retrospective and a positive outlook on how the team plans to move forward in the next sprint.
